Poofer Tower - Vaporizer section

- A simple 120 PSI poofer with a 40lb accumulator on top of a 30 ft tower. Very similar to last year - with an upgrade: we added an **electric vaporizer** (Zimmer P40)

Poofer Tower - Vaporizer section

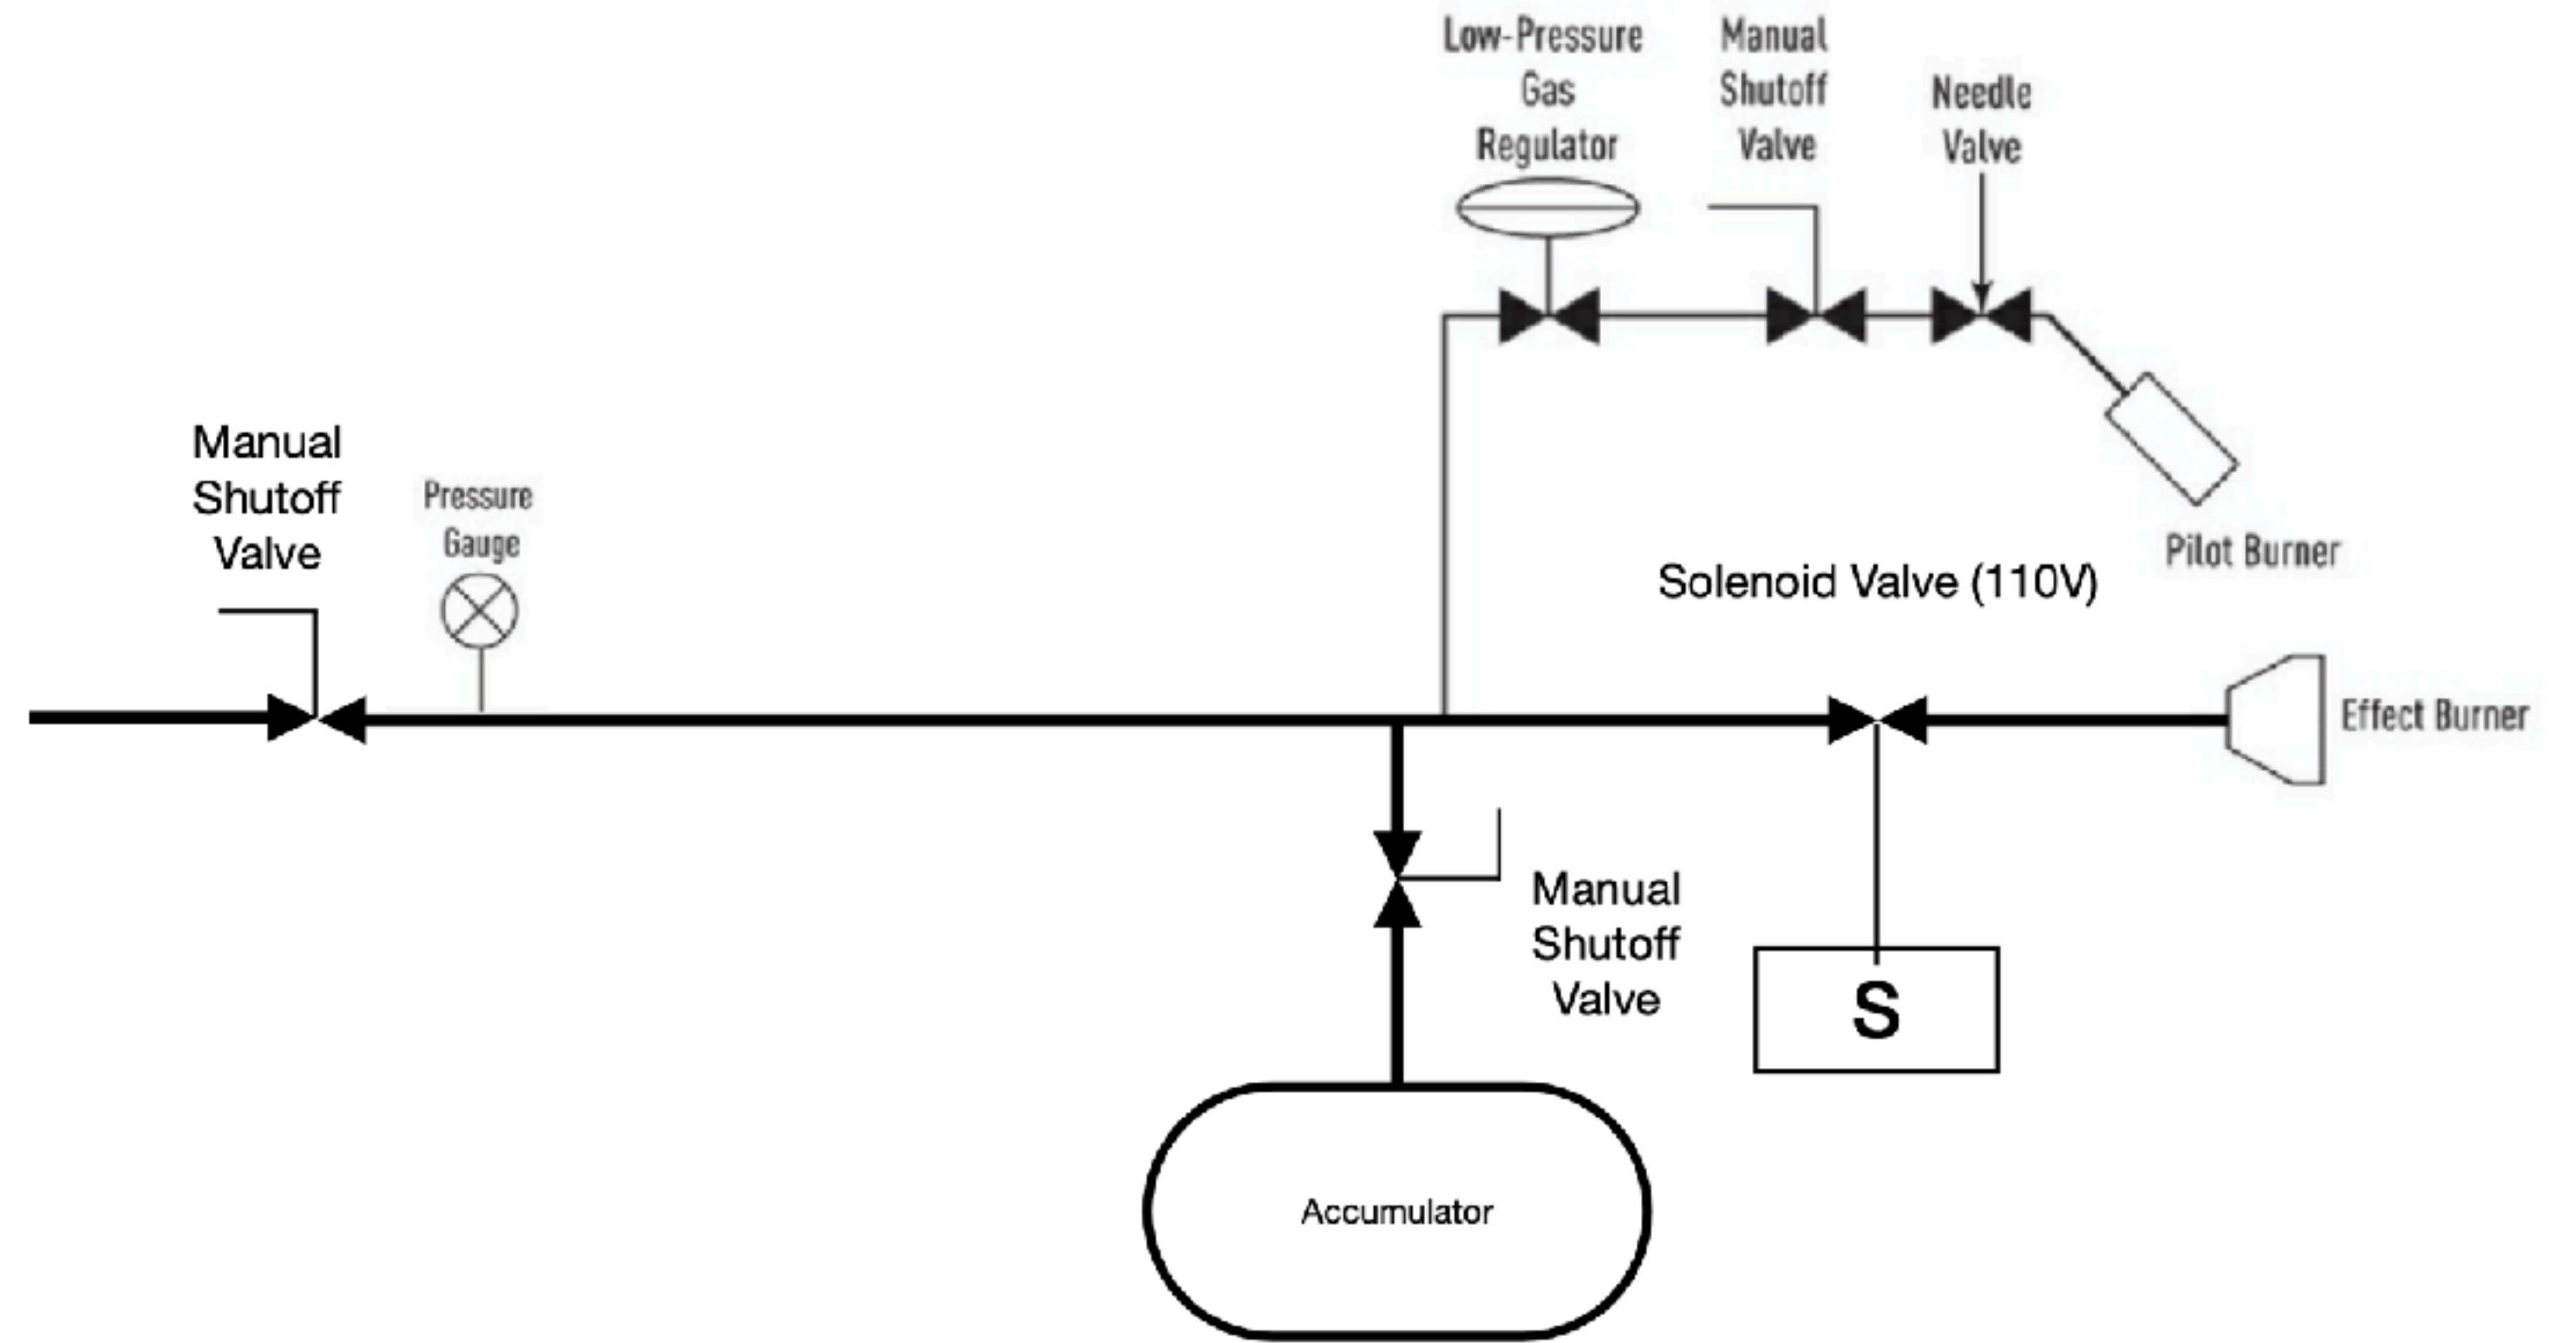

Notes:

- This design was inspired after consultation 2 fire art experts (flaming lotus girls, and chester art car). It was also verified
- The vaporizer will be held vertically on a metal mount
- The vaporizer+effect has been tested
